Write a class called EvenNumbers that prints all of the even numbers from 2 to 100 inclusive, separated by a "", and puts a new line after every multiple of 20 (20, 40, 60, 80). Use a for loop, and modulus division.

For example:

2,4,6,8,10,12,14,16,18,20
22,24,26,28,30,32,34,36,38,40
42,44,46,48,50,52,54,56,58,60
62,64,66,68,70,72,74,76,78,80
82,84,86,88,90,92,94,96,98,100
